

# The Clever Closure

The versatility of Tambortech Doors is as diverse as the individual style and needs of home owners across Australia.

Discover some amazing ways Tambortech Doors can transform your home.

## TambortechDoors

Tambortech Doors are Australia's best kept secret! The doors roll up without impeding on your benchtop, workspace or walk way.

You will be amazed at how tambour doors transform kitchens by creating more space, concealing clutter and combining designer elegance that home owners dream of.

#### Available in a wide range of Materials and Finishes...

#### Applicable for a wide variety of uses.

- Benchtop Storage
- Splashback Pantries
- Beverage Cupboards
- Laundries
- Appliance Cupboards
- TV Units
- Display Cabinets
- Electronic Control

With so many options, it's easy to make Tambortech Doors central to your kitchen design. This is one secret you'll love to share.

We pride ourselves in offering a product of the highest quality, design and functionality.

## Secret weapon in kitchen design

Splashback or Pantry?

The kitchen looks normal – benchtop, splashback and overhead cupboards. Voila... the splashback rolls up to reveal a storage space capable of housing a full complement of goods.

Any combination of appliances, crockery, glassware, food stuffs, groceries, cereals, spices, etc can be stored directly in your benchtop preparation area.

Ideal for kitchens where space is at a premium or for larger kitchens wanting a slick, no clutter, no fuss design. Like all Tambortech products, when people call, your clutter can be quickly concealed. Just close the door. It is that simple.

The Splashback Pantry is the essential inclusion required to create your ultimate kitchen.

## One stop shop

The perfect storage for your kettle, toaster, glasses, mugs, coffee and tea - everything you need for a thirsty family

Overhead cupboard doors can be awkward to use, but, with a full height Tambortech Door every shelf of your cupboard can be easily accessed. There are no unwieldy hinged doors making it difficult to reach items stored at the top.

Adding a swing handle enables you to gain access to the top shelves of the cupboard and when the Tambortech Door is closed, the handle automatically tucks away.

# The modern laundry

Is your laundry in a hallway or corridor? Does traffic come to a halt when you are loading or unloading your washer or dryer? Would you like to transform your laundry from a practical workspace into a sleek functional wall?

- Easy to use
- No more clutter
- No more eyesores
- Stylish and effective
- Neat and tidy

Add an electric motor for fingertip control of your Tambortech Door.

Built by Master Cabinets of Bundaberg

**NOW YOU SEE IT.**

You need a laundry – every household does – but we don't all have the luxury of a separate room, especially those living in units or town houses.

But no-one wants to look at a sink, washer and dryer every time they walk down the hall or into the bathroom.

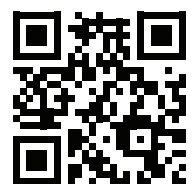

If your laundry is located somewhere you can see it, then hide it. With Tambortech.

From practical workspace to sleek wall, all at fingertip or electronic control, Tambortech transforms the functional into the fabulous.

**NOW YOU DON'T.**

The Modern Laundry

# Everything in its place

Built by Morrison's Cabinets

The appliance cupboard is essential for most kitchens, but, with a Tambortech Door, it soon becomes the ultimate appliance cupboard. Unlike hinged, bi-fold or lift-up doors, the entire space in front of your appliance cupboard can be utilized.

With your appliances already connected to power just open your sleek Tambortech Door and slide out your jug or toaster. When you have finished using the appliance, just place it inside the cupboard and close the door. A quick, no fuss solution.

Your kitchen remains uncluttered without sacrificing the convenience of having your appliances stored on the benchtop.

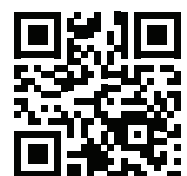

## More than just a pretty face

Many people see the modern panel TV as an eyesore – especially when not in use. If you'd like to conceal the Television and electronic equipment, consider a combination of a Tambortech Door with Alsert sliding doors to make a sleek entertainment unit.

You could add alcove shelving with mood lighting - for evening viewing, the alcove illumination is perfect. Press a button, the Tambortech door opens to reveal the Television and sound system.

When viewing is complete - turn everything off and close the tambour door.

## Technology meets Cabinetry

At the touch of a button, you can control your Tambortech Door. Raise it, lower it or set it to any height in between. It's the effortless answer to accessing your storage.

Lighting can be used to illuminate the space for functionality and design.

The Benchtop Pantry is an amazing storage solution and is worth considering for your next project.
